

SENECIO PLANT NAMED 'SUNSENEBARE'

5

ABSTRACT OF THE DISCLOSURE

10 Disclosed herein is a new variety of Senecio plant
having a semi-dwarf, obconical shaped with abundant
branching and small leaves. The flowers are single and
small, the petals and the disk having vivid reddish
purple color. The blooming time is early and flowering
duration is longer than Senecio cruentus. 'Sunsenebare'
has low fertility.
